Recycling Batteries

<u>Call2Recycle®</u>, Inc., North America's first and largest consumer battery stewardship and recycling organization, today announced a new, expanded all battery service that provides one-stop battery collection and recycling for both <u>rechargeable</u> and <u>single-use</u> (AA, AAA, 9v, D-cell and button cell) batteries under 11 lbs. throughout the United States. Find a <u>call2recycle collection site</u> in Dutchess County.

The new all battery service is available to all of Call2Recycle's 20,000+ U.S. collection sites. In addition, Call2Recycle will offer separate services for single-use and rechargeable battery recycling. Fees vary, depending on the services selected as well as collection volumes and shipping method. Those interested in participating in the new service can use a new <u>online tool</u> to identify which battery recycling solution best meet their needs based on location, type and volume.
